

EURO PRATIK™
— LIMITED EDITION —

LUCO
— INNATE STATEMENT —

Made In Europe

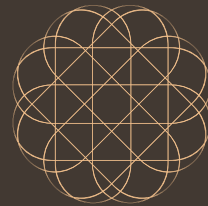

Since inception over 15 years, EURO PRATIK came into existence with an objective of creating world class interior & exterior environment with its innovative visionary products, design & application solutions in the decorative industry.

We are on a path where trust & credibility are of prime importance. With our continuous zest to explore path breaking designs, products & solutions, we create a world of superior interiors with decoratives of 25 revolutionary brands.

We strongly believe that effective marketing and distribution is a key mantra in making of a brand. With our PAN INDIA NETWORK, we have effectively catered to the length and breadth of the nation. With our precision in service. we bring smile to millions.

We have been able to achieve greater heights by sourcing imported materials from across the world, thereby bringing desirable interior decor solutions closer to the Indian market at a competitive price.

LUCO
— INNATE STATEMENT —

BIRCH PLYWOOD grown in cold environment of Europe possesses excellent strength properties with beautiful white fiber which makes Birch Plywood far superior than other plywood manufactured in other parts of the world.

The panels are sanded on both sides and their surface is smooth, hard and durable. Birch plywood is characterized by excellent strength and stiffness properties, and therefore it performs very well in applications demanding high strength and rigidity.

Features of Birch Plywood

- Homogeneous consistent surface
- High quality
- Strong, excellent bending strength
- Decorative
- Easy machining and surface treatment
- Taint and odour free
- Excellent water resistance. Another name of this plywood is WBP (Water Boiled Proof).
- Fully birch construction (all layers of plywood are made of birch veneer with WBP glue).
- Environmental friendly. CARB phase 2 certified.
- Termite and Borer resistant
- 100% Russian hardwood
- Full Panel Full Core
- Lifetime warranty

SPECIFICATIONS

THICKNESS :

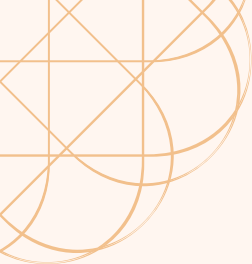

6mm, 9mm, 12mm, 16mm, 18mm, 24mm

SIZE :

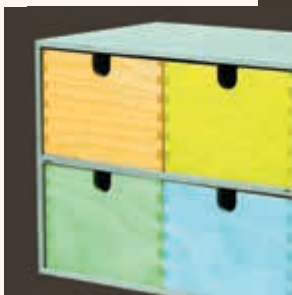

2440mm x 1220mm
(8ft x 4ft)

FACE THICKNESS :

- more than 1mm
- grains available vertical as well as horizontal.

COLOUR APPLICATIONS

RECOMMENDED POLISH :

Any polish to achieve desired colours.

irch plywood is made of cross-bonded 1.4 mm thick veneers. It is a popular fine-grained wood. The high-grade panels are sanded on both sides and their surface is smooth, hard and durable. Birch plywood is characterized by excellent strength and rigidity-related properties, so therefore it performs best in applications demanding high strength and rigidity. Russian birch plywood is also known as Baltic Birch plywood.

Birch plywood has also good resistance to humidity, it is easy to reprocess and easy to handle. Birch plywood can be further processed using different types of film overlay. The properties of the panels surface can be improved or the pattern on the panel surface altered, depending on the intended application. Birch plywood provides a unique combination of strength, flexibility and a perfect look in a light-colored range.

It is commonly used for home improvement projects, particularly cabinet making, and this includes desks and shelves. It can also be popularly used in making children's toys (especially dollhouses), playground fixtures, and sports and musical equipment

Additionally, birch plywood is a durable and well-priced ply, and this makes it a popular choice. When purchasing birch plywood, it is important to note that birch plywood is not one solid piece of wood; it has several layers of birch veneer that are glued together using resin.

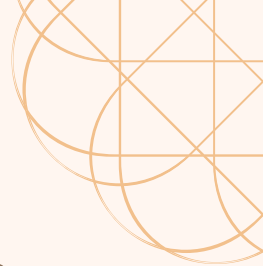

Advantages of Birch Plywood

There are several advantageous properties in Russian plywood products making them the quality solution for your project:

- Favourable weight to strength ratio
- 3 times better than steel (in terms of weight to strength ratio)
- No Need of using Laminate or decorative veneer. It can be directly polished in any desired colour to have the decorative finishes.
- High durability
- Easy to machine and fix using standard machining and fastening methods
- Easy to handle on site.
- Wide variety of different thickness available.
- Termite and Borer resistant
- Lifetime warranty

If you are in the process of choosing plywood for home improvement projects, consider the following 5 advantages of using birch plywood.

1. Aesthetic Advantage

Birch plywood is perfect for home furnishings, as it has a nice, rich sheen, and it gives the end product a nice, elegant finish. Additionally, birch plywood allows you to customize the end product as per your wishes; you can leave it untreated or have it stained. It can also be worked and smoothed over, or it can be left as it is. Either way, you can rest assured that the finished product will still look good.

2. Strength Advantage

Birch plywood is known for its durability. The process of forming the birch plywood reinforces the strength of the original piece of wood.

Birch plywood is formed by layering up three or more layers of birch. This adds a great amount of stability and strength to the plywood.

3. Safety Advantage

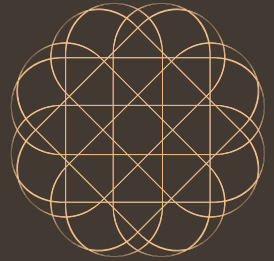

Birch plywood does not have many knots or jagged edges. It is smooth and is not known to splinter or crack. This makes it the wood of choice for cabinet (and other furniture) makers as well as toy makers. In fact, it is ideal for any child-friendly construction.

4. Price Advantage

Another factor that gives birch plywood an edge over other plywood is that it is good to look at, safe, strong, without being too heavy on the wallet. In fact, it is easily available at cost-effective prices.

5. Environmental Advantage

Birch trees are native to northern Europe (mainly Finland and the Baltic) and Russia. It is an abundant, fast growing species. This means that there is no destruction or disruption of biodiversity when birch is felled. It is better to opt for this renewable source than other options that might have a negative impact on the environment.

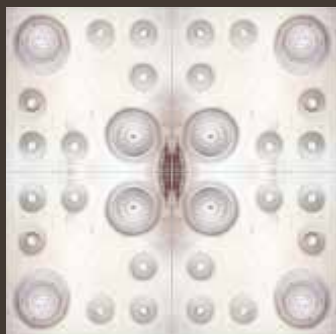

LUCO

EDGE

With LUCO EDGE we presents 18 magnificent designs which form a continuous pattern hence enhancing the beauty of interior spaces such as houses, offices, commercial establishments etc.
